Harold:

Do you agree that more incredible than Lifton's claim that JFK's body was stolen is the fact that Time muggerzine gave two full pages of coverage to it?

Are you sure Lifton has been in mental hospitals? And that he wrote (in Ramparts?) that Rusk and LBJ were behind the assassination and that shots were fired from behind papier-mache trees and from sewers, which were built by Root Construction at the insistence of the CIA?

Also, and most importantly, how are you feeling?
